

Creating an ACTION PLAN in PebblePad

Login to **PebblePad** using your network login or the PebblePad login you have been given.

<http://pebblepad.tsd.ac.uk/>

Click on ‘**create new**’ and ‘**action plan**’

This will bring up the action plan wizard which has 7 steps

In step 1 you give the action plan a **title** and describe the **current situation**.

You can also add a **tag(s)**. It is important to remember that the tags form the filing system and are very helpful when searching your assets

In step 2 you describe the **ideal situation**

In step 4 you create the **steps to success**.

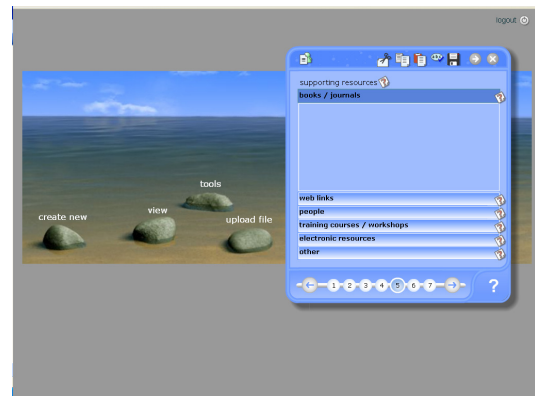

In this example I have created a simple lesson plan.

Type the step into the editing box at the top and then click the **three arrows** to move it down.

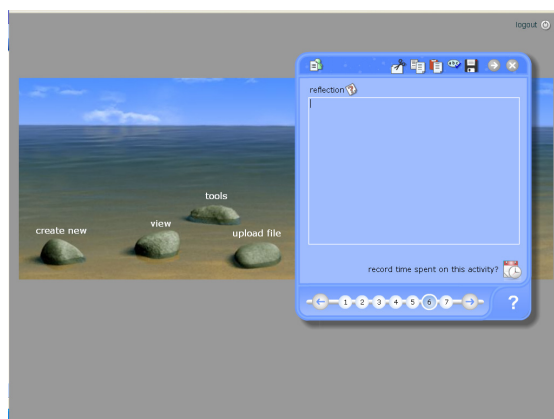

You can edit any step if you want to and you can change the position of a step by using the **up/down arrows**

Step 4 is a **SWOT** analysis and uses an **accordion tool**

Step 5 lets you add any resources and also uses an **accordion tool**

Step 6 is for **reflection**. This can be used at any time in the action planning process

Step 7 asks you what you want to do with the action plan.

There are several choices:

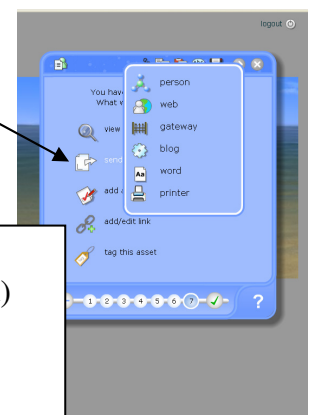

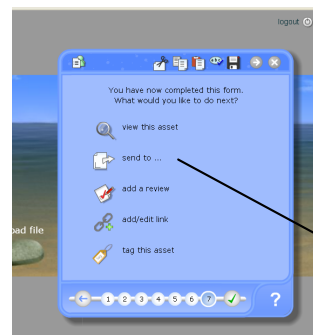

View

Send to...

Add a review

Add/edit link

Tag this asset

The **'send to'** choices:

Person (for sharing e.g. tutor, friend)

Web (gives you a URL)

Gateway (for assessment)

Blog

Word

Printer
